SUMMARY

Software engineer with nine years across Java/Go services and React/TypeScript applications. Connects customer workflows to reliable APIs, accessible interfaces, and tested production releases.

EXPERIENCE

Harborline Commerce | Senior Software Engineer | 2023-06

- Led a three-engineer React/TypeScript merchant dashboard redesign with product and support; reduced support requests about settlement status by 24% over the next quarter.
- Added keyboard navigation, focus management, and accessible form errors to merchant onboarding; introduced axe checks in Playwright regression tests.
- Published a versioned TypeScript client SDK from OpenAPI contracts, adding compatibility tests and migration examples for four internal application teams.
- Mentored two engineers through design reviews and on-call onboarding; introduced short architecture decision records for cross-team API changes.
- Led a phased Java service migration with feature flags, canary releases, and rollback rehearsals; moved five services without a customer-visible outage during the migration.
- Designed Java/Spring Boot payment reconciliation services processing 180,000 daily events; added idempotency keys and replay protection to prevent duplicate ledger entries.
- Reduced checkout API p95 latency from 420 to 260 ms by tracing slow PostgreSQL queries, adding targeted indexes, and moving repeated lookups into Redis.
- Integrated OIDC single sign-on and tenant-scoped authorization for business accounts; added audit events and negative permission tests with the security team.
- Designed Kafka retry and dead-letter handling for order events, documenting ordering and delivery guarantees and adding safe replay tools for support engineers.
- Instrumented six backend services with OpenTelemetry and Prometheus; created Grafana dashboards and runbooks that reduced median incident diagnosis from 42 to 27 minutes.

Pinecrest Freight Systems | Software Engineer II | 2020-03 - 2023-05

- Shipped a React operations map with live shipment updates over WebSockets, working with dispatchers to make late shipments easier to locate.

EDUCATION

Westbridge University | M.S. | Software Engineering | 2022

Lakeview Institute of Technology | B.S. | Computer Science | 2017

SKILLS

Java, Go, Python, JavaScript, TypeScript, React, Spring Boot, Node.js, REST APIs, PostgreSQL, Automated testing, Playwright, Web accessibility, Service architecture, Mentoring and design reviews, Cross-functional delivery, Technical documentation, Developer tooling, Distributed systems, On-call and SLOs, Performance profiling, Application security
