SUMMARY

Software engineer with nine years building and operating backend services, event pipelines, and customer-facing products. Leads practical design decisions, mentors teammates, and follows systems through deployment and on-call support.

EXPERIENCE

Harborline Commerce | Senior Software Engineer | 2023-06

- Published a versioned TypeScript client SDK from OpenAPI contracts, adding compatibility tests and migration examples for four internal application teams.
- Mentored two engineers through design reviews and on-call onboarding; introduced short architecture decision records for cross-team API changes.
- Designed Java/Spring Boot payment reconciliation services processing 180,000 daily events; added idempotency keys and replay protection to prevent duplicate ledger entries.
- Led a phased Java service migration with feature flags, canary releases, and rollback rehearsals; moved five services without a customer-visible outage during the migration.
- Designed Kafka retry and dead-letter handling for order events, documenting ordering and delivery guarantees and adding safe replay tools for support engineers.

Pinecrest Freight Systems | Software Engineer II | 2020-03 - 2023-05

- Developed Go/gRPC shipment-tracking services handling 35,000 updates per minute at peak; added backpressure and bounded retries for unreliable carrier feeds.
- Introduced REST/gRPC contract tests and synthetic carrier fixtures, catching incompatible payload changes before release across three partner integrations.
- Partnered with operations leads to prioritize a quarterly integration roadmap, splitting large carrier requests into independently releasable API changes.
- Cut CI feedback from 18 to 7 minutes by separating unit and integration suites and reusing dependency artifacts in GitHub Actions.

IBM | Software Engineer | 2018-01 - 2020-02

- Developed Java/Spring REST APIs for an enterprise service-management application, implementing request validation, pagination, and structured error responses.

EDUCATION

Westbridge University | M.S. | Software Engineering | 2022

Lakeview Institute of Technology | B.S. | Computer Science | 2017

SKILLS

Go, Node.js, OpenAPI, REST APIs, gRPC, Developer tooling, TypeScript, Java, Python, Automated testing, Service architecture, Technical documentation, Cross-functional delivery, Mentoring and design reviews, Git, CI/CD, Distributed systems
