SUMMARY

Software engineer with nine years across Java/Go services and React/TypeScript applications. Connects customer workflows to reliable APIs, accessible interfaces, and tested production releases.

EXPERIENCE

Harborline Commerce | Senior Software Engineer | 2023-06

- Added keyboard navigation, focus management, and accessible form errors to merchant onboarding; introduced axe checks in Playwright regression tests.
- Published a versioned TypeScript client SDK from OpenAPI contracts, adding compatibility tests and migration examples for four internal application teams.
- Mentored two engineers through design reviews and on-call onboarding; introduced short architecture decision records for cross-team API changes.
- Led a phased Java service migration with feature flags, canary releases, and rollback rehearsals; moved five services without a customer-visible outage during the migration.
- Led a three-engineer React/TypeScript merchant dashboard redesign with product and support; reduced support requests about settlement status by 24% over the next quarter.
- Integrated OIDC single sign-on and tenant-scoped authorization for business accounts; added audit events and negative permission tests with the security team.
- Designed Java/Spring Boot payment reconciliation services processing 180,000 daily events; added idempotency keys and replay protection to prevent duplicate ledger entries.

Pinecrest Freight Systems | Software Engineer II | 2020-03 - 2023-05

- Cut CI feedback from 18 to 7 minutes by separating unit and integration suites and reusing dependency artifacts in GitHub Actions.
- Introduced REST/gRPC contract tests and synthetic carrier fixtures, catching incompatible payload changes before release across three partner integrations.
- Shipped a React operations map with live shipment updates over WebSockets, working with dispatchers to make late shipments easier to locate.

IBM | Software Engineer | 2018-01 - 2020-02

- Added JUnit integration tests and API regression checks to Jenkins builds; reproduced and fixed race conditions in concurrent update flows.

EDUCATION

Westbridge University | M.S. | Software Engineering | 2022

Lakeview Institute of Technology | B.S. | Computer Science | 2017

SKILLS

TypeScript, JavaScript, React, Java, Spring Boot, Python, Go, Node.js, Automated testing, Playwright, CI/CD, Git, REST APIs, gRPC, Web accessibility, Developer tooling, Service architecture, Mentoring and design reviews, Cross-functional delivery, On-call and SLOs, Distributed systems, Technical documentation, OpenAPI, OpenTelemetry
