SUMMARY

Software engineer with nine years improving service reliability, deployment workflows, and data platforms. Builds maintainable distributed services and tools that help application teams ship and diagnose software.

EXPERIENCE

Harborline Commerce | Senior Software Engineer | 2023-06

- Published a versioned TypeScript client SDK from OpenAPI contracts, adding compatibility tests and migration examples for four internal application teams.
- Led a phased Java service migration with feature flags, canary releases, and rollback rehearsals; moved five services without a customer-visible outage during the migration.
- Instrumented six backend services with OpenTelemetry and Prometheus; created Grafana dashboards and runbooks that reduced median incident diagnosis from 42 to 27 minutes.
- Integrated OIDC single sign-on and tenant-scoped authorization for business accounts; added audit events and negative permission tests with the security team.
- Mentored two engineers through design reviews and on-call onboarding; introduced short architecture decision records for cross-team API changes.
- Designed Kafka retry and dead-letter handling for order events, documenting ordering and delivery guarantees and adding safe replay tools for support engineers.

Pinecrest Freight Systems | Software Engineer II | 2020-03 - 2023-05

- Containerized four services with Docker and deployed them to Kubernetes using Terraform-managed AWS infrastructure; documented resource limits and deployment recovery.
- Rotated primary on-call for shipment services; investigated queue lag and database saturation, wrote incident reviews, and added actionable SLO-based alerts.
- Cut CI feedback from 18 to 7 minutes by separating unit and integration suites and reusing dependency artifacts in GitHub Actions.
- Developed Go/gRPC shipment-tracking services handling 35,000 updates per minute at peak; added backpressure and bounded retries for unreliable carrier feeds.
- Built Kafka ingestion with schema validation and deduplication for 14 carrier feeds; added replayable S3 archives and dashboards for delayed or malformed events.

EDUCATION

Westbridge University | M.S. | Software Engineering | 2022

Lakeview Institute of Technology | B.S. | Computer Science | 2017

SKILLS

Kubernetes, AWS, Terraform, Docker, Java, Go, Python, TypeScript, OpenAPI, REST APIs, gRPC, CI/CD, Git, Automated testing, Developer tooling, Service architecture, Distributed systems, On-call and SLOs, OpenTelemetry, Prometheus, Grafana, Application security, OAuth2/OIDC, Performance profiling, Technical documentation, Kafka
