SUMMARY

Software engineer with nine years improving service reliability, deployment workflows, and data platforms. Builds maintainable distributed services and tools that help application teams ship and diagnose software.

EXPERIENCE

Harborline Commerce | Senior Software Engineer | 2023-06

- Published a versioned TypeScript client SDK from OpenAPI contracts, adding compatibility tests and migration examples for four internal application teams.
- Mentored two engineers through design reviews and on-call onboarding; introduced short architecture decision records for cross-team API changes.
- Led a phased Java service migration with feature flags, canary releases, and rollback rehearsals; moved five services without a customer-visible outage during the migration.
- Instrumented six backend services with OpenTelemetry and Prometheus; created Grafana dashboards and runbooks that reduced median incident diagnosis from 42 to 27 minutes.

Pinecrest Freight Systems | Software Engineer II | 2020-03 - 2023-05

- Cut CI feedback from 18 to 7 minutes by separating unit and integration suites and reusing dependency artifacts in GitHub Actions.
- Containerized four services with Docker and deployed them to Kubernetes using Terraform-managed AWS infrastructure; documented resource limits and deployment recovery.
- Introduced REST/gRPC contract tests and synthetic carrier fixtures, catching incompatible payload changes before release across three partner integrations.
- Developed Go/gRPC shipment-tracking services handling 35,000 updates per minute at peak; added backpressure and bounded retries for unreliable carrier feeds.
- Partnered with operations leads to prioritize a quarterly integration roadmap, splitting large carrier requests into independently releasable API changes.
- Rotated primary on-call for shipment services; investigated queue lag and database saturation, wrote incident reviews, and added actionable SLO-based alerts.

IBM | Software Engineer | 2018-01 - 2020-02

- Added JUnit integration tests and API regression checks to Jenkins builds; reproduced and fixed race conditions in concurrent update flows.

EDUCATION

Westbridge University | M.S. | Software Engineering | 2022

Lakeview Institute of Technology | B.S. | Computer Science | 2017

SKILLS

CI/CD, Developer tooling, Automated testing, Git, Service architecture, Mentoring and design reviews, Cross-functional delivery, Technical documentation, On-call and SLOs, Distributed systems, AWS, Terraform, Kubernetes, Docker, Go, TypeScript, Python, Performance profiling, OpenAPI
