SUMMARY

Software engineer with nine years building and operating backend services, event pipelines, and customer-facing products. Leads practical design decisions, mentors teammates, and follows systems through deployment and on-call support.

EXPERIENCE

Harborline Commerce | Senior Software Engineer | 2023-06

- Integrated OIDC single sign-on and tenant-scoped authorization for business accounts; added audit events and negative permission tests with the security team.
- Implemented retention jobs and export/delete workflows for customer records, with audit logs and legal-reviewed retention rules across three application databases.
- Designed Java/Spring Boot payment reconciliation services processing 180,000 daily events; added idempotency keys and replay protection to prevent duplicate ledger entries.
- Designed Kafka retry and dead-letter handling for order events, documenting ordering and delivery guarantees and adding safe replay tools for support engineers.
- Mentored two engineers through design reviews and on-call onboarding; introduced short architecture decision records for cross-team API changes.
- Led a phased Java service migration with feature flags, canary releases, and rollback rehearsals; moved five services without a customer-visible outage during the migration.
- Instrumented six backend services with OpenTelemetry and Prometheus; created Grafana dashboards and runbooks that reduced median incident diagnosis from 42 to 27 minutes.

Pinecrest Freight Systems | Software Engineer II | 2020-03 - 2023-05

- Developed Go/gRPC shipment-tracking services handling 35,000 updates per minute at peak; added backpressure and bounded retries for unreliable carrier feeds.
- Containerized four services with Docker and deployed them to Kubernetes using Terraform-managed AWS infrastructure; documented resource limits and deployment recovery.

IBM | Software Engineer | 2018-01 - 2020-02

- Integrated an existing OAuth2 provider into internal APIs and tested expired-token and unauthorized-access behavior.

EDUCATION

Westbridge University | M.S. | Software Engineering | 2022

Lakeview Institute of Technology | B.S. | Computer Science | 2017

SKILLS

OAuth2/OIDC, Application security, Data retention and privacy, Go, Java, Distributed systems, Service architecture, On-call and SLOs, Performance profiling, Kubernetes, AWS, CI/CD, Automated testing, Mentoring and design reviews, Cross-functional delivery, Technical documentation, gRPC, REST APIs, Kafka, PostgreSQL
