SUMMARY

Software engineer with nine years across Java/Go services and React/TypeScript applications. Connects customer workflows to reliable APIs, accessible interfaces, and tested production releases.

EXPERIENCE

Harborline Commerce | Senior Software Engineer | 2023-06

- Led a three-engineer React/TypeScript merchant dashboard redesign with product and support; reduced support requests about settlement status by 24% over the next quarter.
- Added keyboard navigation, focus management, and accessible form errors to merchant onboarding; introduced axe checks in Playwright regression tests.
- Reduced checkout API p95 latency from 420 to 260 ms by tracing slow PostgreSQL queries, adding targeted indexes, and moving repeated lookups into Redis.
- Mentored two engineers through design reviews and on-call onboarding; introduced short architecture decision records for cross-team API changes.
- Built OpenSearch-backed merchant order search with filtered queries and pagination; worked with support staff to validate relevance against 120 recurring lookup tasks.
- Published a versioned TypeScript client SDK from OpenAPI contracts, adding compatibility tests and migration examples for four internal application teams.
- Designed Java/Spring Boot payment reconciliation services processing 180,000 daily events; added idempotency keys and replay protection to prevent duplicate ledger entries.

Pinecrest Freight Systems | Software Engineer II | 2020-03 - 2023-05

- Shipped a React operations map with live shipment updates over WebSockets, working with dispatchers to make late shipments easier to locate.
- Partnered with operations leads to prioritize a quarterly integration roadmap, splitting large carrier requests into independently releasable API changes.
- Developed Go/gRPC shipment-tracking services handling 35,000 updates per minute at peak; added backpressure and bounded retries for unreliable carrier feeds.

Aldercrest Digital | Junior Software Engineer | 2017-06 - 2017-12

- Built responsive React pages and Node.js REST endpoints for two small-business websites, translating designer mockups into tested reusable components.

EDUCATION

Westbridge University | M.S. | Software Engineering | 2022

Lakeview Institute of Technology | B.S. | Computer Science | 2017

SKILLS

React, TypeScript, JavaScript, Node.js, Java, Go, REST APIs, WebSockets, Web accessibility, Playwright, Automated testing, Performance profiling, Cross-functional delivery, Mentoring and design reviews, Service architecture, Data analysis, On-call and SLOs
