SUMMARY

Software engineer with nine years across Java/Go services and React/TypeScript applications. Connects customer workflows to reliable APIs, accessible interfaces, and tested production releases.

EXPERIENCE

Harborline Commerce | Senior Software Engineer | 2023-06

- Integrated OIDC single sign-on and tenant-scoped authorization for business accounts; added audit events and negative permission tests with the security team.
- Implemented retention jobs and export/delete workflows for customer records, with audit logs and legal-reviewed retention rules across three application databases.
- Led a three-engineer React/TypeScript merchant dashboard redesign with product and support; reduced support requests about settlement status by 24% over the next quarter.
- Led a phased Java service migration with feature flags, canary releases, and rollback rehearsals; moved five services without a customer-visible outage during the migration.
- Instrumented six backend services with OpenTelemetry and Prometheus; created Grafana dashboards and runbooks that reduced median incident diagnosis from 42 to 27 minutes.
- Designed Kafka retry and dead-letter handling for order events, documenting ordering and delivery guarantees and adding safe replay tools for support engineers.
- Added keyboard navigation, focus management, and accessible form errors to merchant onboarding; introduced axe checks in Playwright regression tests.
- Designed Java/Spring Boot payment reconciliation services processing 180,000 daily events; added idempotency keys and replay protection to prevent duplicate ledger entries.
- Built OpenSearch-backed merchant order search with filtered queries and pagination; worked with support staff to validate relevance against 120 recurring lookup tasks.

Pinecrest Freight Systems | Software Engineer II | 2020-03 - 2023-05

- Built Python/SQL ingestion into a warehouse for shipment-delay analysis; introduced data-quality checks and cut daily dataset preparation from 75 to 25 minutes.
- Built Kafka ingestion with schema validation and deduplication for 14 carrier feeds; added replayable S3 archives and dashboards for delayed or malformed events.

EDUCATION

Westbridge University | M.S. | Software Engineering | 2022

Lakeview Institute of Technology | B.S. | Computer Science | 2017

SKILLS

Python, React, TypeScript, JavaScript, PostgreSQL, REST APIs, Kafka, Data pipelines, Data analysis, Application security, Data retention and privacy, Automated testing, On-call and SLOs, OpenTelemetry, Prometheus, Grafana, Mentoring and design reviews, Service architecture, Cross-functional delivery, CI/CD, Go, Search relevance
