SUMMARY

Software engineer with nine years improving service reliability, deployment workflows, and data platforms. Builds maintainable distributed services and tools that help application teams ship and diagnose software.

EXPERIENCE

Harborline Commerce | Senior Software Engineer | 2023-06

- Integrated OIDC single sign-on and tenant-scoped authorization for business accounts; added audit events and negative permission tests with the security team.
- Led a phased Java service migration with feature flags, canary releases, and rollback rehearsals; moved five services without a customer-visible outage during the migration.
- Mentored two engineers through design reviews and on-call onboarding; introduced short architecture decision records for cross-team API changes.
- Designed Java/Spring Boot payment reconciliation services processing 180,000 daily events; added idempotency keys and replay protection to prevent duplicate ledger entries.
- Reduced checkout API p95 latency from 420 to 260 ms by tracing slow PostgreSQL queries, adding targeted indexes, and moving repeated lookups into Redis.
- Instrumented six backend services with OpenTelemetry and Prometheus; created Grafana dashboards and runbooks that reduced median incident diagnosis from 42 to 27 minutes.
- Designed Kafka retry and dead-letter handling for order events, documenting ordering and delivery guarantees and adding safe replay tools for support engineers.
- Led a three-engineer React/TypeScript merchant dashboard redesign with product and support; reduced support requests about settlement status by 24% over the next quarter.

Pinecrest Freight Systems | Software Engineer II | 2020-03 - 2023-05

- Developed Go/gRPC shipment-tracking services handling 35,000 updates per minute at peak; added backpressure and bounded retries for unreliable carrier feeds.
- Rotated primary on-call for shipment services; investigated queue lag and database saturation, wrote incident reviews, and added actionable SLO-based alerts.
- Partnered with operations leads to prioritize a quarterly integration roadmap, splitting large carrier requests into independently releasable API changes.

EDUCATION

Westbridge University | M.S. | Software Engineering | 2022

Lakeview Institute of Technology | B.S. | Computer Science | 2017

SKILLS

Service architecture, Mentoring and design reviews, Distributed systems, On-call and SLOs, Application security, OAuth2/OIDC, Performance profiling, Java, Go, Spring Boot, Kafka, PostgreSQL, Redis, OpenTelemetry, Prometheus, Grafana, Kubernetes, CI/CD, Automated testing, Cross-functional delivery, Technical documentation, LLM integration
