SUMMARY

Software engineer with nine years improving service reliability, deployment workflows, and data platforms. Builds maintainable distributed services and tools that help application teams ship and diagnose software.

EXPERIENCE

Harborline Commerce | Senior Software Engineer | 2023-06

- Designed Java/Spring Boot payment reconciliation services processing 180,000 daily events; added idempotency keys and replay protection to prevent duplicate ledger entries.
- Designed Kafka retry and dead-letter handling for order events, documenting ordering and delivery guarantees and adding safe replay tools for support engineers.
- Instrumented six backend services with OpenTelemetry and Prometheus; created Grafana dashboards and runbooks that reduced median incident diagnosis from 42 to 27 minutes.
- Reduced checkout API p95 latency from 420 to 260 ms by tracing slow PostgreSQL queries, adding targeted indexes, and moving repeated lookups into Redis.
- Led a phased Java service migration with feature flags, canary releases, and rollback rehearsals; moved five services without a customer-visible outage during the migration.

Pinecrest Freight Systems | Software Engineer II | 2020-03 - 2023-05

- Developed Go/gRPC shipment-tracking services handling 35,000 updates per minute at peak; added backpressure and bounded retries for unreliable carrier feeds.
- Built Kafka ingestion with schema validation and deduplication for 14 carrier feeds; added replayable S3 archives and dashboards for delayed or malformed events.
- Rotated primary on-call for shipment services; investigated queue lag and database saturation, wrote incident reviews, and added actionable SLO-based alerts.
- Partitioned growing PostgreSQL event tables and introduced scheduled archival; reduced a key reporting query from 11 to 3 seconds on the team's load-test dataset.
- Containerized four services with Docker and deployed them to Kubernetes using Terraform-managed AWS infrastructure; documented resource limits and deployment recovery.
- Built Python/SQL ingestion into a warehouse for shipment-delay analysis; introduced data-quality checks and cut daily dataset preparation from 75 to 25 minutes.

EDUCATION

Westbridge University | M.S. | Software Engineering | 2022

Lakeview Institute of Technology | B.S. | Computer Science | 2017

SKILLS

Go, Java, Python, PostgreSQL, SQL, Kafka, gRPC, REST APIs, Distributed systems, On-call and SLOs, Performance profiling, Data pipelines, Data analysis, AWS, Amazon S3, Docker, Kubernetes, Terraform, CI/CD, Automated testing, OpenTelemetry, Prometheus, Grafana, Application security, Service architecture, Cross-functional delivery
